Hyperion essbase admin guide templates

In Oracle RAC, for example, these intervals can be completely dynamic and demand-based because the database is shared. This software or hardware and related documentation may provide access to or information about third-party content, products and services. Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. Oracle Corporation and its affiliates are not responsible and expressly disclaim all warranties of any kind relating to third-party content, products and services, unless otherwise provided in an applicable agreement between you and Oracle. All rights reserved. Oracle Corporation and its affiliates disclaim all responsibility for any damages caused by the use of this software or hardware in hazardous applications. In addition to the database services used by applications, Oracle Database also supports two internal database services: SYS$BACKGROUND is used only by background processes and SYS$USERS is the default database service for user sessions not associated with services. The information contained in this document is subject to change without notice and should not be error-free. Except as expressly permitted by the license agreement or permitted by law, you may not use, copy, reproduce, translate, transmit, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form or by any means. Authors: EPM Information Development Team This software and its documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. When configuring database services, each service is assigned a unique name, associated performance targets, and associated significance. On the contrary, Data-dependent routing is routed to database services according to data keys. Database services divide the workloads for a single database into mutually disconnected groupings.
